5. Conclusion

1. Introduction

In 2018, 26 million people visited San Francisco, more than 30 times 800,000 people in San Francisco, and more than 25 million in Australia. I would like to analyze the crime patterns of San Francisco because I think that analyzing the crime patterns in San Francisco can be useful as a useful resource for tourists to travel safely.

The data includes the type of crime, the area where the crime occurred, the time of the crime, the day of the crime and the date of the crime. Analyzes crime occurrence patterns and provides information for tourists to travel safely.

2. Data

Based on definition of our problem, factors that will influence our decision are:

- * Day of Crime occurrence
- * Time of Crime occurrence
- * Place of Crime occurrence
- * Compare to place of crime and attraction

Let's download and import the data on police department incidents using pandas read_csv() method.

Download the dataset and read it into a pandas dataframe:

```
import pandas as pd
import matplotlib.pyplot as plt
import numpy as np
import seaborn as sns
from sklearn.pipeline import Pipeline
from sklearn.preprocessing import StandardScaler, PolynomialFeatures
%matplotlib inline

df_incidents = pd.read_csv('https://s3-api.us-gso-objectstorage.softlayer.net/cf-courses-data/CognitiveClass/DV0101EN/labs/Data_Files/Police_Department_Incidents_-_Previous_Year__2016_.csv')
print('Dataset downloaded and read into a pandas dataframe!')
```

IncidentNum	Category	Descript	DayOfWeek	Date	Time	PdDistrict	Resolution	Address	X	Y	Location	PdId

So each row consists of 13 features:

- > 1. ****IncidentNum****: Incident Number
- > 2. ****Category****: Category of crime or incident
- > 3. ****Descript****: Description of the crime or incident
- > 4. ****DayOfWeek****: The day of week on which the incident occurred
- > 5. ****Date****: The Date on which the incident occurred
- > 6. ****Time****: The time of day on which the incident occurred
- > 7. ****PdDistrict****: The police department district
- > 8. ****Resolution****: The resolution of the crime in terms whether the perpetrator was arrested or not
- > 9. ****Address****: The closest address to where the incident took place
- > 10. ****X****: The longitude value of the crime location
- > 11. ****Y****: The latitude value of the crime location
- > 12. ****Location****: A tuple of the latitude and the longitude values
- > 13. ****PdId****: The police department ID

4. Results and Discussion

I have classified the crime data in San Francisco into four categories: Category, DayOfWeek, Time, and PdDistrict.

Among the types of crimes, LARCENY/THEFT was the largest number. LARCENY/THEFT accounts for about 27%.

Day of week crime rates were roughly the same, but the most were on Friday. LARCENY/THEFT was more frequent on Fridays and Saturdays. And more than 1000 cases were compared to other days of the week.

Crime is common at lunch time and dinner time. LARCENY/THEFT was most frequent in the evenings. The overall crime occurred a lot during lunch and dinner, while LARCENY/THEFT took place in the evening. To determine the reason, we analyzed the time of occurrence of OTHER OFFENSES and NON-CRIMINAL, which were the second and third of the crime types. Other crimes and non-crimes were found to occur mainly during lunch time.

The police department district, SOUTHERN, NORTHERN, and MISSION were found to have caused a lot of crime. These three districts account for 45% of all crimes.

The map describes crime counts on police department district.

The map shows main tourist attractions in San Francisco, the Golden Gate Bridge, Lombard St, Union Square, and Fishermans. Through this, the correlation between crime area and tourist attraction was confirmed. The main crime area was found around Union square.

5. Conclusion

The report analyzes crime in San Francisco by crime type, time, day of week, and district. LARCENY/THEFT accounted for the largest proportion of crime types and the most crimes happened on Friday. Even when LARCENY/THEFT were classified according to the day of week, it was confirmed that the most theft occurred on Friday.

By the time, the total crime occurred a lot during lunch time and dinner time, but LARCENY/THEFT occurred the most during the evening. Analysis of OTHER OFFENSES and NON-CRIMINAL, the second and third most common crimes, revealed that these two types occurred most frequently at lunch. This can be inferred from the fact that these two types often occur during lunchtime.

According to the analysis of the relationship between crime-prone areas and tourist attractions, 45% of crimes occurred in UNION SQUARE.

Tourists traveling to San Francisco are advised to watch out for theft on Friday, evening and near the UNION SQUARE.

Data to help San Francisco tourists travel safely.
